DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert C. Faber (Registration No. 24,322) on March 30, 2004.

The application has been amended as follows: claim 1, line 10, -- device -- has been inserted after "transfer" and before "intermittently".

Examiner's Statement Of Reason For Allowance

2. The following is an examiner's statement of reasons for allowance:

Claims 1-19 are allowable.

Regarding claim 1, the prior art of record does not teach all the combined components and or elements for a rotary press for printing patterns on a support strip including an intermittent drive operable on the strip material for driving the strip material through the transfer intermittently and at the speed of the support strip; the intermittent drive being operable for driving the strip material from the supply in a direction transverse to the lengthwise direction of the support strip.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record does not teach all the combined components / elements as discussed above in the "examiner's statement of reasons for allowance".

Cahill (US Patent 5,618,378), discloses a system that comprises means for applying the images may comprise opposed cylinders which press the web and the stock together, the cylinders being arranged so that pressure is applied between the web and the stock only at positions corresponding to said predetermined positions on the stock where the images are to be applied. In this way the cylinders may be rotated at a constant speed corresponding to the speed of the stock, whereas the web may be moved at a different speed other than when an image is being applied. There may be several transversely spaced webs for applying separate images to transversely-spaced positions on the stock. A common drive system may be provided for each of the webs, possibly with individual tensioning means for each web.

Fausto et al. (US Patent 6,302,016 B1), discloses a printing machine comprising a paper sheet-feed device, a device for transferring the papers toward a printing unit, a device for transferring printed sheets toward a unit for checking the print quality and a unit for storing printed sheets.

Uehara (US Patent 6,595,130 B2), discloses comprises an impression cylinder for receiving sheet-like object and holding the sheet-like object, a first printing portion for printing

Art Unit: 2854

the sheet-like object held by the impression cylinder, a second printing portion disposed at transport direction downstream side of the first printing portion for printing the sheet-like objects held by the impression cylinder, a number printing portion disposed at transport direction downstream side of the second printing portion for number printing the sheet-like object held by the impression cylinder, and a transport cylinder disposed at transport direction downstream side of the number printing portion for receiving the sheet-like object held by the impression cylinder.

Weis (US Patent 6,193,640 B1), discloses a paper web feeding device for a folding mechanism of a web-fed rotary printing press. A plurality of partial paper webs are combined into one or more partial paper web strands.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wasseem H Hamdan whose telephone number is (571) 272-2166. The examiner can normally be reached on M-F (first Friday off) 6:30 AM- 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Andrew H Hirshfeld can be reached on (571) 272-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
